

COMMUNITY HEALTH

Medical Faculty may be home of new divisions

Following the decision by Governing Council on April 18 to set up a new Division of Community Health, the Academic Affairs Committee is recommending that the new unit be established as Division III of the Faculty of Medicine. This proposal is in line with recommendations of the Hygiene Task Force Report and has gone to the Planning and Resources Committee for its approval.

To ensure that the new division will be able to carry out its mandate, the Academic Affairs Committee also recommended the following safeguards: the new division will receive a budget that is separately identified from the Faculty of Medicine for the first five years; an Associate Dean should be appointed, in the first instance, on the recommendation of a search committee appointed by the President and there should be a formal review of the new structure after a five year period.

The recommendations came after two meetings of the Academic Affairs Committee, on April 24 and 30, and after a great deal of debate on the relative merits of having an independent division or one located within the Faculty of Medicine.

The acting director of the School of Hygiene, Prof. G.H. Beaton, expressed reservations about the proposed location. He said, "The placement of the division within the Faculty of Medicine is feasible but not necessarily the best solution."

The acting director of the Department of Health Administration, Dr. J.E.F. Hastings, had several objections to the proposed recommendations. He said two major studies were being conducted in the United States on the future of health administration and the tentative conclusion was that there were important links between health administration and medicine but these links were not the most important ones.

He stressed the need for the new division to be able to have multiple links with other areas of the University, and he cited the Faculty of Management Studies and the Department of Political Economy as examples.

Dr. Hastings said the recommendations put too much emphasis on the professional aspects of the proposed program and expressed concern that the academic components would suffer.

Prof. Charles Hanly, chairman of the Graduate Studies, Prof. F.A. Sherk, said the graduate academic programs would not be lost but would merely have to find a home in new departments. If nothing new was added to the existing graduate programs, there would be no problem and they would be continued, he said. Dean Sherk pointed out that, if the programs were modified, they would have to be subject to the normal internal and external review processes.

Prof. Charles Hanly, chairman of the Task Force on the School of Hygiene, emphasized that the Task Force Report wanted links with other areas continued and strengthened.

After close to three hours of debate the committee had adopted six of the 13 proposed recommendations unanimously and agreed by a vote of eight to three to

(Continued on page 4)

Prof R B Salter is honoured abroad in Sims Professorship

Dr. R.B. Salter, Professor, Department of Surgery and Surgeon-in-Chief and Senior Orthopaedic Surgeon of The Hospital for Sick Children has recently returned from overseas where he served as the 1973 Sir Arthur Sims Commonwealth Travelling Professor.

The appointment of the Sims Commonwealth Professorship, which includes all specialties of medicine, surgery and research, is made by the Royal College of Surgeons of England on the recommendation of an international Advisory Board and is considered to be one of the highest academic honours in the Commonwealth.

Of the 44 previous Sims Commonwealth Professors only three have been orthopaedic surgeons. Seven of the previous Sims Professors have been Canadians including three from the University of Toronto — the late Prof. R.I. Harris, the late Prof. R.M. Jones and Dean Emeritus A.L. Chute.

During the four-month academic commitment in England, Scotland, Ireland, South Africa and Rhodesia Dr. Salter visited 89 hospitals in 34 centres, delivered 105 lectures on a total of 21 topics, attended 67 clinical case conferences to discuss problem patients, and discussed 75 presentations by local orthopaedic surgeons. Despite the heavy academic and ambassadorial commitments Dr. and Mrs. Salter returned to Canada in good health having enjoyed the experience enormously.

While serving as the 1973 Sims Commonwealth Professor, Dr. Salter was awarded an Honorary Fellowship in the Royal College of Surgeons of Edinburgh and an Honorary Fellowship in the College of Medicine of South Africa. In addition he received the Sir Thomas Dixon Medal from the University of Belfast and the Abraham Colles Medal from the Royal College of Surgeons in Ireland.

EXHIBITIONS

Annual summer exhibition of student work. Architecture, 230 College St. May 10 through September.

Stamps — selected Pages from the Studylist Gift Collection of Great Britain. Stamp Corner, ROM, To May 31.

Paul Kane's Canadian West. Sigmund Samuel Canadiana Building. To June 16.

Stars, Bears and Dragons. Theatre of the Stars, McLaughlin Planetarium. To June 16.

One Hundred Years of Oceanography. Third Floor Rotunda, ROM. To April 24.

Proposing to teach college subjects in new University departments and foster distinctive instruction

New University departments will be created for what are at present college subjects of Classics, English, French, German, Near Eastern Studies, Philosophy and Religious Studies, if Governing Council adopts proposals approved by both the Academic Affairs Committee and the Planning and Resources Committee on April 23.

The agreement is one reached by a committee of college principals and senior University officials to reconsider the roles of colleges in the Faculty of Arts and Science. The committees first met in joint session and then separated to discuss the document in detail.

The main objectives of the proposal include:

Fostering in the colleges the development of distinctive approaches to educational teaching;

Making it possible for most students in the Faculty of Arts and Science to study as much as possible in their own colleges; and

Broadening the scope of subjects taught by colleges to include the social, physical and life sciences.

Other objectives include allowing colleges to engage in broader academic counselling; facilitating informal interaction between students and professors; arranging for college sections of populous courses where these are desirable and

feasible, having in mind the expressed course choices of its students; developing proposals consonant with the academic emphasis of the colleges and the needs of the students.

Under the proposal, mechanisms will be created for the setting up of new departments, including the appointment of a chairman, associate chairmen (one for undergraduate studies and one for graduate studies), the appointment and cross-appointment of faculty members, determination of college programming and the setting up of a Collegiate Board.

The proposal also outlines principles for financial arrangements and proposes arrangements for interim financing in 1974-75 and a transitional financial arrangement for 1975-79.

The groups affected by the proposals include the colleges of the St. George campus and Etiradale College.

Arts and Science Dean Robert A. Greene told the two committees that the proposals were "an experiment which will depend upon good faith and cooperation for its success".

In the Academic Affairs Committee the question of cross-appointments arose and Dean Greene suggested that the colleges would not want a professor who was reluctant to teach a college subject. He further suggested that no professor would be required to teach such a course if he did not wish to do so.

U of T libraries' summer hours

Summer hours, from May 10 to Sept. 8, (with some exceptions) have been established for all libraries administered directly by the Central Library. They are as follows:

Roberts Library: administration office and reader registration office — Monday-Friday, 9 a.m.-5 p.m.; all other departments — Monday-Thursday, 8.30 a.m.-9 p.m.; Friday, 8.30 a.m.-6 p.m.; Saturday, 9 a.m.-1 p.m.; Sunday, closed.

Science and Medicine Library: May 10-May 23 — Monday-Friday, 8.30 a.m.-midnight; Saturday, 9 a.m.-5 p.m.; Sunday, closed; May 24-Sept. 8 — Monday-Thursday, 8.30 a.m.-9 p.m.; Friday, 8.30 a.m.-6 p.m.; Saturday, 9 a.m.-5 p.m.; Sunday, closed.

Sigmund Samuel Library: May 10 — 8.30 a.m.-6 p.m.; May 11, 9 a.m.-5 p.m.; Sunday, May 12, closed; May 13-Aug. 16 — Monday-Thursday, 8.30 a.m.-10.30 p.m.; Friday, 8.30 a.m.-6 p.m.; Saturday, 9 a.m.-5 p.m.; Sunday, closed; Aug. 17-Sept. 8 — Monday-Thursday, 8.30 a.m.-9 p.m.; Friday, 8.30 a.m.-6 p.m.; Saturday, 9 a.m.-5 p.m.; Sunday, closed.

Thomas Fisher Rare Book Library: Monday-Friday, 9 a.m.-5 p.m.

College and Branch Libraries: Engineering — from May 4, Monday-Thursday, 8.45 a.m.-9 p.m.; Friday, 8.45 a.m.-6 p.m.; Saturday, 9 a.m.-5 p.m.; Sunday, closed.

Hygiene — May 10-May 18, Monday-Friday, 8.45 a.m.-9 p.m.; Saturday, 9 a.m.-5 p.m.; Sunday, closed; May

19-Sept. 8, Monday-Friday, 9 a.m.-6 p.m.; Saturday, 9 a.m.-5 p.m.; Sunday, 9 a.m.-5 p.m.; May 11, 9 a.m.-5 p.m.; Sunday, closed; May 13-Aug. 16, Monday-Thursday, 8.30 a.m.-10.30 p.m.; Friday, 8.30 a.m.-6 p.m.; Saturday, 9 a.m.-5 p.m.; Sunday, closed; Aug. 17-Sept. 8, closed.

Mathematics — Monday-Friday, 8.45 a.m.-5 p.m.

Pharmacy — from May 3, Monday-Friday, 8.45 a.m.-5 p.m.

Other campus libraries are usually open Monday to Friday from 9 a.m. to 5 p.m., but hours vary and should be checked with the library concerned.

Get company clearance for release of information

Some words for the wise: if you are working on a company sponsored thesis, be very sure that company will give clearance for complete release of the information. One graduate geology student found there was quite a "misunderstanding" when he did not get permission for disclosure on paper. It seems that his field work turned up a likely looking showing of mineralization and the company showed a marked change of heart. Unless he can find another form of funding all his work will be lost.

Taken from the Department of Geology News-letter.

Search underway for Physiology chairman

The Provost has established a committee to make a recommendation for the appointment of a chairman for the Department of Physiology. The present chairman, Prof. R.H. Hoar, will complete his first term on June 30, 1975.

The members of the committee are: Dr. G.E. Connell, Associate Dean, Medicine (chairman); Prof. L. Butler, Associate Dean, Graduate Studies; Prof. D.W. Clarke, Physiology; Prof. H.

Sonnenberg, Physiology; Dr. R. Volpe, Medicine; Prof. H. Schachter, Biochemistry; Prof. W. Kalow, Pharmacology; Prof. R. J. M. Fredrickson, Otolaryngology, and Dr. A. Naimark, Dean, Faculty of Medicine, University of Manitoba.

Members of the University are invited to communicate their views concerning the chairmanship to any member of the Committee, preferably before May 10.

BULLETIN DEADLINE

The University of Toronto Bulletin is published on an *ad hoc* basis, generally once a week on Fridays. Copy should be typewritten and double-spaced. The deadline for most material is seven days before publication.

Physical and Health Education — continuation of the Report

The final two sections of the *Progress Report of the Task Force on the Government and Administration of Athletics and Physical Recreation* are printed below. These follow and complete the report that appeared in the April 26 issue of the Bulletin.

Professional Staff Status

The Task Force recognizes that questions of academic status and job security are of special concern to the members of the two existing Athletic Departments, since there is at present no overall policy which defines their roles. The Task Force has not discussed these matters in detail and invites comment from interested parties. We offer the following suggestions. First, any staff member cross-appointed to the School for classroom instruction required by the School's academic program should be eligible for professional titles, progress through the ranks, and tenure on the same basis as any other academic staff member of the University. Secondly, an appropriate policy covering appointment and job security status can be developed for Departmental staff including those who are cross-appointed to the School solely for skills instruction and who are not normally engaged in research or student supervision. Such a policy might be modelled on relevant cases elsewhere in the University, as discussed on pp. 75-77 of the recent *Presidential Task Force on Academic Appointments*. Such a model would involve the following elements:

1. Two special categories of appointment, Instructor and Senior Instructor;
2. A salary floor for Instructors identical to that for Lecturers in academic departments, as revised periodically;
3. A salary ceiling for Senior Instructors identical to that for Associate Professors, as revised periodically;
4. Annual increments awarded on the same basis as adopted for other academic ranks;
5. Initial appointment at the rank of Instructor except in special circumstances;
6. Following a three-year probationary period on annual appointments, an Instructor, after a review of his or her performance prior to November of the third year, would become eligible for the rank of Senior Instructor and would receive a five-year contract subject to renewal for further five-year periods if performance continues to be satisfactory;
7. During the probationary period, seventy months' required notice of intention not to renew an annual appointment; thereafter, 12 months' required notice;
8. Reviews mentioned in (6) to be

Moss Scholarships won by D G Laughton and I L Morrison

Mrs. Jane Simms, B.A. 670, chairman of the University of Toronto Alumni Association Scholarship Committee, has announced the names of the two graduating students in Arts and Science who are to be recipients of Moss Scholarships for 1974. They are David Graham Laughton of Victoria College and Ian Lewis Morrison of University College.

The Committee of Selection judged both winners to be outstanding students who have also contributed to the governance of the University and have been active on faculty and student committees. Mr. Laughton's academic interests are in the field of physics which he will pursue at Princeton.

Mr. Morrison is a mathematician who will do graduate work at Harvard.

The John H. Moss Scholarships have been awarded annually since 1921. John H. Moss graduated from University College in 1889 and, following his untimely death from influenza in 1920, a number of his friends set up a fund in his memory. His widow, Christine M. Moss, took an interest in the award and in her will provided a substantial sum of money for its enhancement. This year, each award is worth \$4,000.

constituted by the Department Director on the model of a decanal tenure committee, as discussed in the above report;

9. Workloads comparable to the total workloads of those holding other academic ranks and, in terms of assignment of teaching duties, explicit recognition of non-engagement in research, graduate supervision and, where appropriate, administration.

Hart House

The Task Force has discussed with representatives of Hart House the relations between the House and any new athletic governing structure. We recognize that Hart House has a special role within the University concerning cultural and recreational programs. This is true for all its members, but especially for our alumni, since it provides one of the few concrete ways of continuing their campus involvement. We believe that this special role, again particularly in regard to the alumni, requires the continued sponsoring of some physical recreation programs as part of the House's overall program. We also acknowledge that such activities have and will no doubt continue to benefit undergraduate members of the House. However, the Task Force also realizes that the scope of physical recreation programs on campus even at present, far exceeds Hart House's reach in terms of space and budgetary allocations. This situation will greatly increase once the new athletic complex is open.

The Task Force has the following suggestions for preserving Hart House's creative role in a situation where overall responsibility for physical recreation policy will likely be vested in a structure which is quite distinct from Hart House. We suggest that Hart House and its programs relate to the Department of Athletics in generally the same way we suggest for the School of Physical and Health Education and its programs. The House would decide its programs based on its overall objectives and on its own budgetary resources. It would state on an annual basis its facility needs, both for the North Wing of Hart House and for any other physical facilities on campus. Programs supported by Hart House resources would have priority for scheduling in the North Wing. Programs suggested by Hart House but actually supported through the Departmental budgets would have their priority decided by the Athletics and Recreation Council. On-going programs supported by Hart House and requiring Departmental staff could result in formal cross-appointment, as is suggested for the School.

The Task Force suggests that all athletic facilities on campus should be under the jurisdiction of the Athletics and Recreation Council. Any conflict arising from this situation because of Hart House's special role, as outlined above, should be adjudicated by the special five-person committee already mentioned, with the two School representatives replaced by the Warden and Chairman of the Hart House Graduate Committee. In addition, Hart House should be given formal opportunities to state whether programs scheduled in the North Wing by the Athletics and Recreation Council are inconsistent with Hart House objectives. The House should also be given formal opportunities to state preferences re any capital expenditure in regard to renovations made to integrate the present facilities.

The Task Force is aware that its acknowledgement of a special role for Hart House, together with our earlier suggestion that alumni be elected to the Athletics and Recreation Council via the House's Graduate membership, could be taken as implying that all alumni who wish to use athletic facilities become eligible to do so through their membership in Hart House. We welcome any comment from alumni and Hart House.

Arts and Science

PROF. D.C. SCOTT has been named to the Editorial Board of the *Journal of Economic Geography* for 1974-79.

Appointed & Promoted

Emmanuel College

Emmanuel College has announced the appointment of THE REV. DR. HEINZ GUENTHER as Professor of New Testament Literature and Exegesis to succeed Prof. E. Cyril Blackman when the latter retires in June. Dr. Guenther is at present in the Department of Theology at Kwansai Gakuin University in Japan where he has been a permanent staff member of the Faculty since 1963. He was educated in Germany at the Universities of Heidelberg and Hamburg; he did graduate work in theology at Union Theological Seminary, New York, receiving his S.T.M. degree (magna cum laude) in 1962. In 1969 he was awarded the Th.D. degree of Victoria University having majored in his doctoral work in New Testament studies. Dr. Guenther is a keen student of

Japanese language and culture being an excellent linguist.

Nursing

PROF. KATHLEEN ARPIN was appointed Clinical Coordinator effective Jan. 1. Prof. Arpin was previously associated with the College of Nurses of Ontario since 1966.

PROF. DOROTHY BROOKS has been appointed Director of the Continuing Education for Nurses Program. Prof. Brooks was associated with Northeastern University as Administrative Assistant and Acting Director of the Learning Centre, Office of Educational Resources, and more recently, with Ryerson Polytechnical Institute in the capacity of Coordinator of the Intensive Care Program.

Pollution of the cottage country: Prof Bernhart offers solutions

It is hardly necessary to stress the importance of the subject of a slim volume by Prof. Alfred B. Bernhart to the growing problem of pollution of the recreational waters of Ontario. Those regions most acutely affected are the lakes and rivers of our rocky cottage country which is and has been developed over the past 20 years on the Canadian Shield, but also includes the 30,000 islands of Georgian Bay, Manitoulin Island and the Bruce Peninsula. The flat western shore of the Bruce Peninsula is especially vulnerable. The high water levels of recent years have flooded the sanitary facilities of thousands of cottages.

Prof. Bernhart, Civil Engineering, provides a variety of solutions for various terrains with professional precision and authority. The principles are simple and rational. They are to maximize aerobic digestion in septic tanks, and to maximize the utilization of sewage nutrients on shore, to grow desirable vegetation including shrubs and trees, by means of shallow "evapotranspiration beds" rather than deep filtration beds. The septic beds presently approved in Ontario are essentially deep filtration beds which work well enough in parts of the province with large areas of deep, well-drained soil. In these locations anaerobic bacteria eventually use for fix the nitrogen and phosphorus and keep these elements from entering streams and lakes. Along rocky shores with scanty soil the officially prescribed septic filter beds too often act only as filters. They do remove most of the potentially dangerous bacteria but they let through most of the nitrogen and phosphorus into the nearby water and stimulate the growth of algae and water weeds.

If channels develop in the sandy filter beds as they often do, even the bacteria from the septic tanks can pass quickly

through them and stream over the rocky shore or pass through fissures into the water or into wells at a great distance and thereby increase the hazard of water borne infections.

In our opinion the Department of the Environment of Ontario should give serious consideration to the recommendations of Professor Bernhart and encourage their application, particularly in our shallow-soiled vulnerable cottage country. Their potential for implementation in more extensive installations for housing developments should also be examined thoroughly. They could decrease significantly the cost of sewage disposal.

J.K.W. Ferguson

(Dr. Ferguson was Director, Connaught Medical Research Laboratories, 1955-1972)

Treatment and Disposal of Waste Water from Homes by Soil Infiltration and Evapotranspiration, 2nd Ed. Vol. 1

By Alfred P. Bernhart
University of Toronto Press, 173pp.

Prof Strangway will head Lunar Science Council

The University Space Research Associates, a group of faculty members who have jointly formed a consulting company, have formed a Lunar Science Council.

The council will consist of scientists representing universities which have an active lunar research program and will be responsible for the technical programs of the Lunar Science Institute. Four universities designated so far will be joined by two or three others in the near future.

Prof. David Strangway will represent the University of Toronto and be chairman.

Ph.D. Orals

Monday, May 6

Miss Phyllis M. Wrenn, Department of French, "Deductive Molecular Structures in Canadian French as Spoken at Lafontaine, Ontario". Thesis supervisor: Prof. P. Leon. Croft Chapter House, University College, 2 p.m.

Ms. D. M. Spector, Department of Physics, "Determination of Positronium-Gas Atom Collision Cross Sections". Thesis supervisor: Prof. A.L. Paul. Room 108, 16 Hart House Circle, 10 a.m.

P. J. Blahy, Department of Educational Theory, "The Effect of Selected Variables on Teachers' Path-Goal Cognitions". Thesis supervisor: Dr. J.C. Croft. Room N217, Ontario Institute for Studies in Education, 2 p.m.

A.E. Lemire, Department of Chemistry, "A Study of Hindered Rotation in Some Group IV Esters of N,N-dimethylcarbamate and N,N-dimethylthiocarbamate". Thesis supervisor: Prof. J.C. Thompson. Room 107, 16 Hart House Circle, 10 a.m.

Charles S. Glasspool, Department of English, "The theme of Social Justice in

the Drama of John Galsworthy". Thesis supervisor: Prof. R. Davies. Round Room, Massey College, 10 a.m.

Thursday, May 9

R. J. Potvin, Department of Educational Theory, "Didactic Teaching Approach to the Implementation of Interpersonal Coping Skills". Thesis supervisor: Dr. C.M. Christensen. Room 108, 16 Hart House Circle, 10 a.m.

Guggenheim Fellowships for 2 U of T professors

Dr. Scott M. Eddie, associate professor of economics and Dr. James T. Lemon, associate professor of geography, have been awarded Guggenheim Fellowships for 1974.

Prof. Eddie will spend the year studying "Agrarian reform in Eastern Europe, 1919-38" and Prof. Lemon will be doing "Comparative studies on neighbourhood development in Canada, the United States and the United Kingdom".

STAFF NOTES

Dentistry

DR. R. L. ELLIS attended the C.D.A. Conference for Dental Auxiliaries in Banff from Jan. 23 to 25.

Hygiene

DR. R. J. SHEPHARD gave two invited lectures to the Australian Council for Rehabilitation of the Disabled (Melbourne, Feb. 2-3) speaking on "Fitness and Recreation-cost to a Nation" and "In Conclusion a Strategy for Recreation and Rehabilitation of the Disabled". He was also an invited lecturer at the World Congress of Sports Medicine (Melbourne, Feb. 4-9), presenting the papers "Mild or Intensive Exercise in Post-coronary Rehabilitation?", "Physiological Characteristics of the White-water Paddler" (with K. Sidney) and "Marathon Running after Myocardial Infarction" (with T. Kavanagh). During the week of Feb. 10-17, he was the guest of the Post-graduate Medical Federation of the Australian Universities, visiting Sydney, Adelaide and Brisbane and presenting a total of thirteen lectures on selected aspects of exercise physiology, post-coronary rehabilitation and sports medicine.

DR. S. S. DESSER presented two lectures to the Department of Microbiology, Ohio State University on Feb. 21. He spoke on "The Comparative Ultrastructure of the Haemosporea" and "Mysteries of Parasitic Protozoa as Revealed by Electron Microscopy".

Continuing Studies

PROF. CARLOS YORIO presented a paper on "Grammatical Complexity and the Teaching of Reading in an ESL

Course" at the Eighth Annual Conference, March 5-10, of TESOL (Teachers of English to Speakers of Other Languages) at Denver. Prof. Yorio also addressed ESL Teachers of the Borough of North York on Feb. 15 on Professional Development Day, on the subject "Teaching the Structures of English - Why and How".

Education

PROF. HOWARD HAINSWORTH attended the annual meeting of the American Council on the Teaching of Foreign Languages in Boston, Nov. 21 to 24.

PROF. NATALIE KUZMICH'S paper presented at the Ontario Educational Research Council Conference was "Creative Affective Approaches to Music Learning."

PROF. R.G. BURFIELD attended the Annual Ontario Association for Curriculum Development Conference held in Ottawa Nov. 8, 9 and 10.

PROF. ALEX JAMESON conducted a workshop for the Ontario Educational Association at the University of Waterloo on Nov. 17, called "Humanizing the Classroom".

PROF. G.A. WHYTE made liaison visits in January to a number of universities - Wilfrid Laurier, McMaster, Queen's, and the University of Western Ontario.

PROF. G. de B. ROBINSON welcomed a Science Council Committee visiting the University on February 20. The purpose of the committee is to study the role of mathematics in the future in the areas of industry and education.

PROF. J. W. GREIG is preparing a report entitled "Teacher Education for a Co-operative Republic," to be presented to the Minister of Education of the Republic of Guyana. While in Guyana recently, Professor Greig conducted a number of seminars on research needed in teacher education.

On Feb. 23, the Art Education Department hosted a meeting of the national executive of the Canadian Society for Education through Art, at which plans were developed for the society's National Assembly in Charlotteville next October. PROF. JOHN EMERSON is a vice-president of CSEA.

PROF. B.E. CONCHIE has been named to the Advisory Board of *The Consumer Interest*, a publication of the University of Guelph.

On Jan. 29 PROF. G.W. BANCROFT was chairman of a conference on the Chinese Community in Toronto and its relationship with professional and para-professional workers. The conference was sponsored by the Intercultural Committee of the Ministry of Community and Social Services.

PROF. L.J. LA FAVE attended the Canadian Teachers' Federation Workshop at Montebello, Que., during the week of Jan. 28. PROF. D.L. MUMFORD was also at this workshop. The subject under discussion was "Designing a High Quality Practicum."

D.W. BOOTH gave Language Arts workshops in the Borough of York, Halton County, and for the Program Consultants of the Ministry of Education, on Jan. 10 and 11. Mr. Booth addressed the annual sales meetings of Fitzhenry & Whiteside publishers and also Longman's publishers on the topic "Books and Non-Book Kids," on Jan. 11.

PROF. A.M. GIFFORD is at present in England on a four-week research tour of colleges of education and Theatre in Education teams. His tour is financed by FEUT and the Council for Drama in Education.

PROF. R.W. DENT spoke to the Ontario Association of University Registrars at McMaster University on Jan. 30 on "Behaviour and University Administration". Prof. Dent gave the opening address at the meeting of the Canadian Association of Broadcasters in Montreal on Jan. 31 on the topic "Television and Mass Media in the Home Now and in the Future". On Feb. 6 he spoke to the RCMP on "Operant Behaviour" and "Social Deviation".

On January 22, PROF. C.C. BRODEUR visited the Biofeedback Laboratory of Nova University in Fort Lauderdale, Florida, and conferred with the director Dr. William Love, one of the pioneers in the field of biofeedback research.

THE RESIDENT VILLAGE at Scarborough College, seen here, will provide housing on a weekly or monthly rental basis from mid-May to mid-August. The village is composed of townhouse units 300 yards south of the main entrance to the college. The townhouses, which generally accommodate from four to six persons, are fully furnished. There are coin-operated laundry facilities and a bus service, both college and TTC, is readily available. For further information, call 284-3174.

Minutes of SGS Council meeting

Summary of Minutes of SGS Council, held on April 16, 1974.

Business arising from minutes

Dean Safarian indicated that letters inviting staff to serve on a Decanal Committee to consider the practices and procedures with respect to Ph.D. oral examinations had been sent out.

Report of the dean

1. *1974-75 Calendar*: Dean Safarian reported on discussions that had taken place in the Subcommittee on Curriculum and Standards and in the Academic Affairs Committee.

(i) The Dean of the School of Graduate Studies and Vice-Provost agreed to initiate a study to examine information systems existing in the University, to attempt co-ordination.

(ii) The Subcommittee requested the School of Graduate Studies to initiate a general inquiry into the acceptability of the Master of Philosophy degree and to report to the Subcommittee on Curriculum and Standards.

(iii) The Dean of the School of Graduate Studies agreed to conduct an inquiry into the duration of the Faculty of Dentistry course 1017, Advanced Oral Radiology (Division IV, p. 3 of the School of Graduate Studies proposal on

amendments to the Calendar and course of study for the 1974-75 session).

With respect to (ii), Dean Safarian stated that a Decanal Committee would be set up to conduct a general review of the Ph.D. degree.

2. *Interim Report on Fellowships*: On behalf of the Dean, Assistant Dean Sheik (Chairman of the Fellowship Committee), reported that he had only a general report to make. The offers of awards had been sent out but statistics had not yet been compiled.

Appeal by Department of Sociology with Respect to Proposed Changes in the Department's Ph.D. Regulations

Council heard an appeal from the Department against the decision of the Executive Committee of Division II not to approve the proposed abolition of course work in the Ph.D. program in Sociology. After a full discussion, Council approved the following motion: "That the decision of the Executive Committee of Division II be sustained."

ACAP Review

Prof. Merrilees presented a comprehensive summary of the entire ACAP process. He noted that since the preparation of the summary, reports for History and Religious Studies had been received.

Library is assigning carrels and lockers

The library will assign carrels and book lockers for the summer session beginning Monday, May 13. Assignments to students who applied last January will be made on the basis of priorities indicated then by the graduate departments concerned. Assignments to students applying for the first time will be made after confirmation of their status by the departments concerned. Since more carrels have become available in the meantime, the library expects to be able to accommodate more members of the teaching staff this summer at least.

Assignments will be made as applications are received by the Carrel Supervisor, Circulation Department during the following weeks:

Full-time Doctoral students and Faculty members on leave: May 13-17 (9 a.m. - 5 p.m.);

Full-time Masters students and other Faculty members: May 21-24 (9 a.m. - 5 p.m.);

Part-time Doctoral and Masters students: May 27-31 (9 a.m. - 5 p.m.).

Chairman is sought for biochemistry dept

The Provost has established a committee to make a recommendation for the appointment of a chairman for the Department of Biochemistry. The present chairman, Prof. G.R. Williams, will complete his first term on June 30, 1975 and he has requested that he not be considered for a second term.

The members of the committee are Dr. G.E. Condon, Associate Dean, Faculty of Medicine (chairman); Prof. W. Thompson, Biochemistry; Prof. A. Bennick, Biochemistry; Dean L. Butler, Graduate Studies; Prof. K. Yates, Chemistry; Prof. J.T. Murphy, Physiology; Dr. A. Rothstein, Director, Research Institute, Hospital for Sick Children; Dr. J.A. Little, Medicine; St. Michael's Hospital; and Dr. D.S. Layne, chairman, Biochemistry, University of Ottawa.

Members of the University are invited to communicate their views concerning the chairmanship to any member of the committee, preferably before May 13.

Scarborough and Erindale safety shows improvement over 1973

For the first quarter of 1974 the University's safety record shows deficiencies in each of four areas measured (lost time, medical aid, Workmen's Compensation Board cost, and frequency), reports James H. Murphy, chief safety officer.

"The departments with consistently good performance remain so", Mr. Murphy says. "Scarborough and Erindale Colleges are continuing 1974 on a zero frequency basis; in fact, they are the only two areas to show an improvement over their 1973 performance. A good deal of work took place in these colleges during the latter half of 1973 in the form of management training programs, first aid training for staff members and, in Scarborough, the re-establishment of its safety committee."

"The major problem areas are the smaller departments. Of five lost time accidents to date in this area, two were back strains, two involved lacerations and one fracture. The five accidents occurred in five different departments: Institute of Child Study, Centre for Industrial Relations, Department of Botany, Simcoe Hall, and the Computer Centre. The locations are mentioned to point out that

all areas, large and small, must be constantly on the alert for the unexpected.

"It is evident that the first quarter of 1974 does not meet the required standards. During the same period in 1973, we were being threatened with penalty assessment under the Workmen's Compensation Act. We were successful in our appeal against the penalty assessment. It is imperative that we avoid a similar penalty in the future."

Arts and Science seeking

Linguistic Studies chairman

A search committee to recommend a successor to Prof. N.E. Collinge as chairman of the Department of Linguistic Studies has been established within the Faculty of Arts and Science. Its members are:

Dean R.A. Greene (chairman), Associate Dean J.E. Cruise (Arts and Science); Prof. Brian Merrilees (Graduate Studies); Prof. B. Brainerd (Mathematics and Linguistics); Prof. J.K. Chambers (Linguistics); Prof. J.J. Chew (Anthropology); Prof. H.A. Gleason (Linguistics); and Prof. H.E. Rogers (Linguistics and Anthropology).

Prof Thomas' TV 'Victorians' available to educational institutions

Flower sellers in the mid-1800s: a scene from the TV program 'Victorians'

The U of T Media Centre has sold to the Ontario Educational Communications Authority a 13-part series entitled "Victorians". The series was originally conceived by Prof. Alan Thomas for use in his English C22F at Scarborough College "to give students a flavour of the time" and encourage them to dig more deeply for additional material.

The programs will be broadcast on channel 19 and will be available to all educational institutions in Ontario through OECA's VIPS (Video Program Service).

Until now, only an occasional videotape made by an educational institution in the province has met Channel 19's tough technical and purchasing standards. The 13 Victorian programs are thus the first series produced wholly within one of Ontario's sixteen universities to make its way to the home screen.

The series is designed to convey, with as direct and unmediated an experience as possible, an awareness of the nature of Victorian life. The subjects, as the title indicates, are individuals and groups whose lives express something of the many diverse aspects of the age: socially, they range from common soldiers to the Queen and include a poacher, the country currier, railway men, actors and a Bohemian artist.

There are two vignettes on Canada in

the series. The first, "From the Backwoods", traces the arrival and establishment and gradual hard-won rise in prosperity of an English immigrant family in Eastern Ontario. The second, "With the Governor General", is an account of smart garrison life in Canada at a crucial historic period - just before Confederation - told by a witty English lady, the wife of the Governor General's A.D.C.

Prof. Thomas was assisted in production of the series by Ms. Barbara Pfefferman. Prof. Thomas' special area of research is Victorian social writing.

Enquiries regarding the availability of these programs within the university should be addressed to Lynnette Mannion of the Media Centre, telephone 928-6520.

First aiders are needed for instructors' courses

The Safety Section of the Personnel Department has an urgent need for holders of the standard First-Aid Certificate willing to take a course leading to an instructor's certificate.

Those who achieve the certificate will be qualified to teach the emergency first-aid course, which is eight hours in length, and the standard first-aid course, which runs for 16 hours.

Interested persons should call Mr. Fries at 928-8787.

Renunion today for surgeons who studied under Dr W E Gallie

The first reunion for those living surgeons who took their specialty training in the University of Toronto, is to be held today. It will be known as "Gallie Day" after William Edward Gallie, Surgeon-in-chief of the Hospital for Sick Children, 1920-1929; chairman of the University's Department of Surgery; Surgeon-in-chief of the Toronto General Hospital, 1929-1947, and Dean of Medicine from 1936 until 1946.

Dr. Gallie completely reorganized the training of surgical specialists when he became chairman and the principles that he then established have been used ever since as the guidelines for the course. His own students were known familiarly as the "Gallie Slaves" and many of them now hold senior positions in various parts of the world.

Since the time of Dr. Gallie, there have been four chairmen of the Department: Drs. R.M. Jones, F.G. Kergin, and W.R. Drucker. Societies were started by students of each that bore the names of Gallie, Jones and Kergin. Each held an annual reunion. However, as Dr. Donald R. Wilson, the present chairman, points out, membership of these societies has been depleted by the passage of time. There has been a growing feeling that a single society, known as the Gallie Club, meeting each year for an exchange of surgical knowledge and later for more convivial entertainment, would be a more effective means of renewing old friendships and memories.

Today's events will begin at the Medical Sciences Building with University

Dr. W E Gallie

Grand Rounds, to be followed by a series of lectures dealing with topics of general interest to all the specialists. The afternoon will be devoted to concurrent sessions dealing with matters of particular interest to the specialists: general surgery, orthopaedics, urology, thoracic surgery, plastic surgery, cardiovascular surgery and neurosurgery.

The day's activities will be capped in the evening when the participants will be joined by their partners for a reception and dinner to be held in the Great Hall at Hart House.

COMING EVENTS

Monday 6 May

COLLOQUIUM: History of Science - "How to Explore the History of Ancient Mathematics". A. Szabo, Budapest, and Center for Advanced Study of the Behavioral Sciences, Palo Alto. 2 p.m.; refreshments at 3.30 p.m. (IHPS)

Tuesday 7 May

MUSIC: Jazz Series 1974 - "The Blues" by the Bernie Senensky Group. Bishop White Gallery, ROM. 5.30 p.m. Free

COLLOQUIUM: History of Science - "Musical Theory and Proportion in Pythagorean Science". A. Szabo. 225 Library Science. 4 p.m.; refreshments, 3.30 p.m. (IHPS)

SPRING TEA - at the home of President and Mrs. John Evans, 93 Highland Ave. Fashions by Patricia White and hats by Georgena Spear. 1.30 to 4.30 p.m. Donations in aid of camping program. (Women's Auxiliary of University Settlement)

Wednesday 8 May

CONVOCAION - Victoria College Convocation and Emmanuel College Graduation Convocation Hall. 8 p.m.

Tuesday 14 May

COLLOQUIUM: Psychology - "Developmental Factors Determining Individual Differences in Stress Response". Prof. Seymour Levine, Director, Laboratory of Developmental Psychobiology, Stanford University. 2102 Sidney Smith Hall. 4 p.m. (SGS and Psychology)

MUSIC: Jazz Series 1974 - "Contemporary Jazz" by the Ted Moses Quintet. Bishop White Gallery, ROM. 5.30 p.m. Free

MUSIC - Opera excerpts with piano accompaniment. MacMillan Theatre, Edward Johnson Building. 8 p.m. Different offerings also on May 15, 16 and 17. No tickets, no charge (Music)

Thursday 23 May

MUSIC - William Findlay, cello. Walter Hall, Edward Johnson Building. 8.30 p.m. No tickets, no charge (Music)

Friday 24 May

DINNER - Faculty Club "Family Night". Reception 5.30-6.30 p.m. Dinner 6.30-8.30 p.m.

Community Health new division may go to Faculty of Medicine

(Continued from page 1)

locate the new division within the Faculty of Medicine.

The other six recommendations involve the establishment of the division with the Departments of Epidemiology and Biometrics, Health Administration and a Department of Behavioural Science; the statement of goals for each department; the establishment of a widely represented program committee which would be responsible for the structure of programs in the area of community health and also approved a resolution calling for the new division to provide teaching resources in community health not only for medicine but for any area of the University that needed such resources and recommended against the duplication of such resources elsewhere.

On April 30 the Academic Affairs Committee continued its adoption of the remaining six recommendations. These recommendations involved the composition of the three new departments within the division, Health Administration, Epidemiology and Biometrics, and Behavioural Science; and the location of the other units of the School of Hygiene including microbiology, parasitology and the Department of Nutrition and Food Sciences.

After a request by Dr. R.F. Badgley, chairman of the Department of Behavioural Science, the committee modified an earlier motion to ensure that the new Department of Behavioural Science had as part of its mandate the continuation of its present research and teaching responsibilities.

When Dr. Beaton requested that similar safeguards be added to the terms of reference of the other two departments in the new division, the committee declined on the grounds that such a motion would be redundant in that the wording already approved gives ample protection to current departmental interests.

Dr. Beaton also suggested modifying the proposed departmental membership to include the addition of professors who are involved in community health teaching and research in other faculties. The committee felt that this matter had not been dealt with by the Task Force and

therefore they did not have enough information to make a decision at that time.

Prof. Hanly suggested that this was a matter that could be dealt with after the division was set up through cross-appointments worked out between the departments involved.

The committee approved the creation of a new Department of Epidemiology and Biometrics which would include the present departments of Epidemiology and Biometrics, Environmental Health, Preventive Medicine from the School of Hygiene and Preventive Medicine from the Faculty of Medicine but the committee had some reservations over the proper name for the new department.

Gordon Barnes suggested that Governing Council had set a precedent and the committee might consider calling the department - Department X.

The School of Hygiene's departments of Microbiology and Parasitology were combined by the committee and are to be located within the Basic Science Division of the Faculty of Medicine with this arrangement to be reviewed in about three years with the possibility of a combination with the Department of Microbiology in the Faculty of Medicine's Clinical Science Division.

Prof. Hanly explained that although the Task Force saw some good reasons for locating the Department of Nutrition and Food Sciences within the new division, after considering the Governing Council's wishes to have this department operate as a University resource centre in nutrition and food sciences and after taking into consideration the wishes of the staff, the Task Force decided that the Basic Science Division of the Faculty of Medicine was the best location.

He said there would have to be a great deal of cooperation between this department and the others in the Community Health Division but he thought this could be taken care of through a number of cross-appointments. Dr. Beaton also proposed two motions dealing with the future of the graduate programs of the departments in the new division but the committee deferred consideration until its May 7 meeting.
